

### **Get a free academic license for Celonis**

Celonis Academic Alliance offers free licenses for students and lecturers. Just register here using your official academic email address: <http://academiccloud.celonis.com/login/form>

In the Celonis Academic Cloud, you find several preloaded demo data sets for various business processes like Purchase-to-Pay, Order-to-Cash and many more. But you can also upload and analyze your own source files.

### **Conformance checking in Celonis**

Celonis includes the Proactive insights engine (Pi), which comes with Pi Conformance to compare actual operations to designed processes. Moreover, Pi Conformance automatically identifies the highest priority issues and their root causes.

Here you find a case study application of Pi Conformance: [http://ceur-ws.org/Vol-1920/BPM\\_2017\\_paper\\_192.pdf](http://ceur-ws.org/Vol-1920/BPM_2017_paper_192.pdf)

### **Getting started manual and exercises**

Here you can download a collection of exercises on conformance checking. The tasks are based on the Purchase-to-Pay process in the Academic Cloud (for registration, please see above).

As academic user, you also get a starting manual for conformance checking in Celonis including step-by-step information on how to manually create and mine the target process model. Just send a short email to the Academic Alliance Team and we will immediately send you the manual: [academic.alliance@celonis.com](mailto:academic.alliance@celonis.com)
